PROJECT

NoWait | <https://secret-harbor-33822.herokuapp.com/>

Role: Contributor

A comprehensive restaurant application that allows a customer to make a reservation and create an order, while the restaurant personnel can view and edit reservations and orders.

- Coordinated with three other developers to create the application with all the necessary functionality.
- Implemented the menu page, with cart and checkout functionality, and the list of orders page.
- Utilized AJAX and MySQL database to create, save, update, and delete reservations and order details.

Google Books Search and Save | <https://googlebooks-search.herokuapp.com/>

Role: Developer

An application to search books and save them for later reference.

- Utilized Google Book API to search books, and display the response to the client.
- Implemented save functionality, which user can save and delete books to a database.
- Created the application using React, Node.js, Express, and MongoDB.

Reactor RPS | <http://reactor-rps.herokuapp.com/>

Role: Developer

Play the classic Rock-Paper-Scissors, or the advance version of Rock-Paper-Scissors-Lizard-Spock, game against a CPU, or online two players with your friend!

- Develop a web base single player and online two players Rock-Paper-Scissors game.
- Implemented account creation and leaderboard features to rank each accounts according to their wins and losses.
- Created the application using React, Node.js, Express, MongoDB, Firebase, and Passport.js.
